

Popular AI Tools

Tool	Company	What it does
ChatGPT	OpenAI	General AI assistant for asking questions, writing, brainstorming, explaining topics, summarizing text, translating, working with files/images, and solving problems. It is one of the best all-around tools for everyday use.
Gemini	Google	Google's general AI assistant for writing, planning, brainstorming, simplifying topics, voice conversations, image generation/editing, and everyday help. It is especially useful if you use Gmail, Google Docs, Drive, Chrome, or Android.
NotebookLM	Google	Works with sources you upload, like PDFs, notes, websites, and class materials. It can summarize sources, answer questions from your materials, create study guides, and make audio overviews. Best for studying and source-based work.
Perplexity	Perplexity AI	General AI assistant and answer engine that searches the web and gives answers with sources. It can help with questions, summaries, explanations, and research, but it is especially useful for current information, citations, and finding where an answer came from.
Claude	Claude	AI assistant good for writing, summarizing, analyzing long documents, explaining complex ideas, and helping with technical tasks. It is especially strong for polished writing, coding help, and working through long or detailed information.
Microsoft Copilot	Microsoft	AI assistant built around Microsoft tools like Word, Excel, PowerPoint, Outlook, Teams, and Microsoft 365. It is best for drafting emails, summarizing meetings, making PowerPoint drafts, working with documents, and helping with workplace tasks.
